

Health Policy Highlights for Summer Families & SELA's COVID-19 Quick Reference Guide

Summer 2021

Dear SELA Summer Families,

Our “Health Policy Highlights for Summer Families” has been created to help our families become acquainted with what we believe to be our top 10 most common and important health related policies for our families to understand and follow. In this handbook we have included our “SELA COVID-19 Quick Reference Guide” which details all our COVID-19 policies. We hope that this handbook will give our families a better understanding of what we are doing to maintain a healthy and safe learning environment for your children.

Please know that all SELA’ Health Policies and Procedures, strictly and consistently adhere to laws, mandates, regulations, standards, resolutions, and guideline set forth by the following departments including, Early Education and Care (EEC), Department of Early and Secondary Education (DESE), Massachusetts Department of Public Health (MDPH) and the Center of Disease Control (CDC). These departments serve as the foundation for all our school’s policies, practices, and procedures.

Please feel free to contact our Summer School Nurse, Heather Lynch with any questions or concerns that you may have, and we hope you and your family have a wonderful summer!

Take care,

Emily Colantoni and Heather Lynch
Su Escuela’s School Nurse’s

TABLE OF CONTENTS

1. STUDENT HEALTH RECORDS.....	4
2. STUDENT MASK & HAND SANITIZER PERMISSIONS.....	4

8. PEANUT TREE NUT FREE.....	7
9. INJURY REPORTS.....	7
10. COMMON ILLNESSES THAT WILL EXCLUDE A STUDENT FROM SCHOOL.....	8
11. SELA COVID-19 QUICK REFERNCE GUIDE FOR STUDENTS.....	10

1. STUDENT HEALTH RECORDS

Mandatory Student Health Records must be submitted *prior* to a student's first day of school and are required to be updated annually.

- **Student Physical Exam:** Dated within a year's time of the present date.
**Medical/ Religious Exemptions are also accepted for physicals but may require additional follow up with EEC and/ or DESE for guideline details.*
- **Student Immunization Records:** Current and up to date immunizations, including a lead screening must be listed. **Medical/ Religious exemptions are permitted but must be renewed for each school year.*
- **Student Asthma/Allergy Action Plan** (if needed): Any student who is identified as having a Life-Threatening Medical Condition that requires them to have emergency medications at the school are required to have an Action Plan and Medication Consent Form to be on file **See Action Plans for more details.*

2. STUDENT MASK & HAND SANITIZER PERMISSIONS

1. **Face masks are readily available for every teacher, student (aged 2 and up) and are provided by SELA.**
 - **Students 2 and under:** Are not permitted to wear any type of facial covering due to safety risks.
 - **Students between the ages of 2 and 4:** Will be offered a facial covering indoors with parental/guardian consent.
 - **Students aged 5 and up:** Are required to wear to wear a face mask while indoors.
 - Teachers may not force a child to wear a face mask and must remove the mask if it poses a safety risk.
 - Face Masks will not be worn by students when outside.
2. **Hand Sanitizer (with at least 60% alcohol, not containing methanol) will be provided by SELA when handwashing is not immediately feasible. **Sanitizers from home are not permitted.***
 - **Preschool aged classrooms and above:** Teachers may offer hand sanitizer to students with parental consent only.

- **Infant, Mixed and Toddler classrooms:** Teachers are not permitted to offer hand sanitizer to their students for safety reasons.
- Teachers will assist students with hand sanitizer use and will keep out of reach from children.

3. STUDENT DAILY HEALTH SCREENING

Parents/Guardians must complete a **Daily Health Screening** for their child every morning prior to their child entering the building. The screening asks questions related to a student's overall health and possible exposure risks to **COVID-19**. Students will not be permitted to enter the building until their screening is complete.

4. SUNSCREEN CONSENT

Students aged 6 months and up may have sunscreen applied at school with a parent/guardian consent. Parent/Guardian must send in sunscreen for their child to be kept at the school. **Consent is obtained during admission process.*

- Sunscreen should be clearly labeled with child's full name and must be within the expiration date listed on the sunscreen.
- Sunscreen will be kept inside student's classroom, out of reach from students.
- With gloved hands, teachers will assist students with application of sunscreen as needed. ** Teachers gloves will be changed after each student.*
- Sunscreen will not be shared among other students.
- Sunscreen will be applied prior to outdoor activities and will be reapplied as needed.

5. COMMUNAL MEDICATION CONSENT FORM

Only the School Nurse and/or designated staff members who have completed the 5 rights of medication administration course and who currently possess a current Basic Life Support certificate may administer medications to a student. Universal precautions will be always upheld. Whenever possible School Nurse will administer medications.

With parental and physician consent/signature, students may receive medications from a communal source at school. If a parent does not wish for their child to receive medications from a communal source while at school, they may “opt out.”

OVER THE COUNTER MEDICATIONS

- Acetaminophen/Children’s Tylenol liquid (Headache, toothache, menstrual cramps, fever >100 degrees F and pain as requested by parent. Dose will be weight appropriate.
- Ibuprofen/Children’s Advil liquid (Headache, toothache, menstrual cramps, fever >100 degrees F and pain) as requested by parent. Dose will be weight appropriate.
- Benadryl liquid (Mild allergic reactions, hives, rash). Dose will be weight appropriate.

ADDITIONAL TREATMENTS

- Hibacens (Cleaning wounds and abrasions)
- Caladryl Lotion (itching, rashes, insect bites, poison ivy)
- Antibiotic Ointment (wounds and abrasions)
- Petroleum Jelly/Vaseline (Dry lips or skin) Sterile Eye Drops (Irritated or itchy eyes)
- Sterile Isotonic Eye Wash Solution (Eye irritation or foreign bodies)
- Throat lozenge/Cough drop (Minor cough and throat irritation) **Elementary students only*

6. PRESCRIPTION and NON-PRESCRIPTION MEDICATION CONSENT FORM

Any medication and or treatment, prescription, non-prescription and or over the counter (OTC) that is to be administered or performed for a student while in school must be accompanied with a valid Medication Consent Form.

- Medication Consent Form must be completed fully and signed by parent/guardian and physician to be valid.
- Medication must be labeled with student’s full name, be in its original container and be within the expiration date listed on the container.
- Parent/Guardian is to notify school nurse of the detail regarding why the medication is needed.
- The School Nurse will coordinate the date and time that the parent/guardian will “hand off” the medication to a member of administration.
- Medication should be brought in a clear zip lock bag with student’s name on it

- Medication will be kept in Health Clinic in a locked container.

7. ALLERGY/ASTHMA ACTION PLANS

Allergy and Asthma Action Plan Packet will be provided during the admission process if a parent/guardian states that their child has a life-threatening allergy that requires emergency medications. This packet will provide detailed instructions as to what forms are required to complete and signed. It also details how to send in your child's medication to the school safely.

- Allergy/Asthma Actions Plan will dictate what medications a student will need in the event of a medical emergency. The indications for, signs and symptoms along with physician and parental/guardian consent are obtained via this form.
- Physician may use own Allergy/Asthma Action Form
- If there is any discrepancies parent should be notified as soon as possible to enable them to contact their doctor to clarify.
- During this time, the student cannot attend school until the discrepancy is made clear.
- Medications listed on the Action Plan must *each* be written on their own separate Medication Consent Form. They may not all be written on one form.

8. PEANUT TREE NUT FREE

Peanut and Tree-Nuts are not permitted inside the building for any reason. If a food item is suspected and/or confirmed to be peanut or tree nut based or made in a facility that manufactures peanut/tree nut products, it will be immediately removed and placed in a safe place away from students.

- Parent/Guardian will be notified and if needed permission will be needed to offer the student a SELA provided snack (ie. goldfish, pretzels, apple sauce)

9. INJURY REPORTS

All incidents/injuries will be assessed, treated, and documented. An administrative staff member will notify the students parent/guardian via email, phone or in person depending on the situation and injury.

- Students will be sent home with an Injury Report within 24 hours of any health-related incident/ injury, no matter how small the injury may seem.
- Parents/Guardians are to read, review, sign and return the Injury Report in a timely manner. The signed injury report will be filed in the student medical chart once it is returned.

10. COMMON ILLNESSES THAT EXCLUDE STUDENTS FROM SCHOOL

1. **Exclusionary Symptoms:** Due to COVID-19 the following symptoms are considered “exclusionary” and may require additional documentation to return to school. **See SELA COVID-19 Quick Reference Guide for more details.*
 - a. If a student displays one of the following, they will not be allowed to enter the building and will need a doctor's note or COVID-19 test to return to school.
 - i. Major Symptoms: Fever 100 F or greater, cough, sore throat, difficulty breathing, GI distress (nausea, vomiting, diarrhea), new loss of taste or smell, new muscle aches.
 - b. If a student displays 2 or more of the following, they will not be allowed to enter the building and will need a doctor's note or COVID-19 test to return to school.
 - i. Minor Symptoms: Fatigue, headache, runny nose/congestion, other signs of illness.

**Students must also always be fever free for at least 24 hours, without the use of fever reducing medications and show either an absence of or a significant decrease of their symptoms.*

2. **Contagious Illnesses/Infections:** Any illness/infection that is suspected/determined to be contagious. Such examples include, but are not limited

to, Strep throat, Scarlet Fever, Hand Foot and Mouth Disease, Influenza, Conjunctivitis, or any type of Staph Infection.

- a. If a student displays or is suspected to have a contagious illness/infection they will not be allowed to enter the building and will need one or more of the following to return to school
 - i. Doctor's note stating the date the student can return to school.
 - ii. If on antibiotics, student may return after being on antibiotics for 24 hours or more.
 - iii. If any blisters/sores are noted to be open, draining or otherwise not healed, students may not return to school. Band aids cannot be used to cover these blisters while at school.
 - iv. Student must be fever free for at least 24 hours without the use of fever reducing medications and present well with absent or diminished symptoms.

3. Lice: This includes any active/live lice and evidence of nits. Students' privacy will be always upheld.

- a. If a student is suspected to have lice while in school, the student will be discreetly referred to the school nurse for further assessment. Student may return to school after the follow has occurred.
 - i. Parent/Guardian submits in writing that lice and nits were properly removed.
 - ii. Upon arrival back to school, the nurse will recheck students prior to students returning to the class.

COVID-19 QUICK REFERENCE GUIDE FOR SELA STUDENTS
UPDATED 6.15.21

STUDENT MASK POLICY

1. **Students ages 2 and under:** Are not permitted to wear facial coverings of any kind due to the potential safety risks.
2. **Students between the ages of 2 and 4:** Will be offered a facial covering (SELA provided) while indoors with parent/guardian permission only.
3. **Students ages 5 and above:** Are required to wear a face mask while indoors.

Important Details

If for any reason a student is unable to wear a face mask safely, it will be removed. Teachers and staff are not allowed to force any child to wear a facial covering for any reason.

Per EEC and DESE regulations students are no longer required to wear facial covering while outside, due to studies reporting activities outside being a low exposure risk.

Home masks are not allowed.

TRAVEL POLICY

1. **All Domestic Travel:** No action required.
2. **International Travel:** Notify the school nurse in advance. Documentation will be required for all international travel depending on the level of risk. *Click [HERE](#) for the most current travel recommendations.
 - A. **Travel to a level 1 or 2 risk area: School must receive the following documentation.**
 - Students aged 2 and up, must show proof of their required PCR test that was taken no more than 3 calendar days prior to their return to Massachusetts.
 - B. **Travel to a level 3 or 4 area: The school must receive the following documentation.**
 - Students aged 2 and up, must show proof of their required PCR test that was taken no more than 3 calendar days prior to their return to Massachusetts.
AND
 - Student must remain at home post travel for minimum of 8 days. A PCR test should be taken on the 5th day of return to the United States. Student may return on the 8th with negative test results and no symptoms

Important Details

ONLY A PCR test will be acceptable! Please be sure that this is the test that you are receiving.

Students will not be permitted to enter the building until the above document(s) are received by the school.

STUDENT DISPLAYS EXCLUSIONARY SYMPTOMS

Major Symptoms (*any one symptom is cause for exclusion*) Fever (100.0° F or higher), feeling feverish, has chills, Cough, Sore Throat, Difficulty breathing, Gastrointestinal symptoms (diarrhea, nausea, vomiting), New loss of smell/taste, New muscle aches.

Minor Symptoms (*must be in combination with other symptoms to be cause for exclusion*): Fatigue, Headache, Runny Nose or Congestion, Any other signs of illness.

1. **Student displays one COVID-19 like symptom while at the program or at home from a known cause (e.g., seasonal allergies):** Student may attend school as usual **ONLY** if they have medical documentation on file at the school stating their pre-existing medical condition that could explain and/or excuse their symptom.
2. **Student is symptomatic with one major and/or two or more minor symptoms of COVID-19 that is not related to a known cause:** Student is not to attend school and parent/guardian is to notify the School Nurse for the reason for the absence.
 - A. **Student may return with one of the following documents.**
 - **Negative COVID-19 Test Result AND after being symptom/fever free for at least 24 hours (without the use of fever reducing medications):** Student must present well. Any symptoms that student previously demonstrated must be greatly diminished and or be absent.
 - **Doctor's Note of Medical Clearance:** Student may return due to an alternative diagnosis Symptoms must also be greatly diminished and or be absent. Student must also be fever free for at least 24 hours without the use of fever reducing medications. Doctors note MUST state that a COVID-19 test was not needed if one was not ordered.

Important Details

Students **MUST** be 24 hrs fever free (without the use of fever reducing medications) before returning to school no matter what the reason for the fever.

If student was not seen by a physician and was not tested for COVID-19 and/or does not have a note of medical clearance, student must remain at home for a minimum of 10 days from symptom onset and be 24 hours fever free (without the use of fever reducing medications) and/or with symptom improvement before returning to school.

STUDENT IS A CLOSE CONTACT

Definition: Someone who has been within 6 ft of a confirmed COVID positive person for a cumulative total of 15 minutes or more over a 24-hr period within 2 days of the positive person symptoms onset or the date the test is administered (asymptomatic).

- I. **Student has been determined a “close contact” to a COVID-19 positive individual:** Student may not attend school and parent/guardian is to notify the School Nurse of the details of the potential exposure.
 - A. **If student is a “close contact”, they may return to school with the following documents.**
 - **Proof of Negative COVID test result taken on day 5 or after:** Students can be released from their quarantine on day 8, with a negative COVID-19 Test Result that was taken on day 5 (or after). Student must also be symptom free.
 - **Letter of release from a public health authority (Board of Health, the Community Tracing Collaborative or Primary Care Physician):** If student is not tested, they must remain out of school for at least 10 days after their last exposure to positive person and may return with a letter of clearance from one of the above entities. This is required if a student does not have proof of a negative COVID test.

Important Details

All close contact persons **MUST** continue to be monitored for a total of 14 days after their exposure. If a student is noted to display any symptoms (major or minor) during their 14 days post exposure, they should not attend school and parent/guardian should contact their healthcare provider. If any symptoms are noticed while the student is in school, student will be sent home.

*People who are fully vaccinated or who have been diagnosed with COVID within the past 3 months are **NOT** considered to be close contacts.

STUDENT HAS PENDING COVID TEST

Pending COVID tests include tests administered due to illness, travel, and possible exposure. It does not include routine testing for upcoming medical/dental procedures

1. **Student has a pending COVID test:** Student is NOT to attend school. and parent/guardian is to notify the School Nurse of the details of the test.

A Student may return with negative tests results.

- Parent/ Guardian MUST send in the negative test results prior to their child's return to school

STUDENT/HOUSEHOLD MEMBER IS COVID-19 POSITIVE

1. **Student tests positive for COVID-19:** Student is not able to attend school and parent/guardian is to notify the School Nurse as soon as possible of the details. Parent/Guardian should contact their local Board of Health and or physician for guidance regarding any close contacts, quarantine, isolation, and your child's potential release date.
 - A. **Student may return after the minimum 10-days of isolation in addition to the following.**
 - Send school a copy of the positive test results.
 - Letter of release from a public health authority (Board of Health, the Community Tracing Collaborative or Primary Care Physician)
 - Must be 24 hrs fever free (without the use of fever reducing medications) and/or show a significant improvement of all other symptoms.
2. **Household member test positive for COVID-19:** Student is not to attend school and parent/guardian is to notify the School Nurse as soon as possible of the details. Parent/Guardian should contact their local Board of Health and or physician for guidance regarding any close contacts, quarantine, isolation, and household members potential release date.
 - ◆ See "Student is a Close Contact" for more details

HOW DOES SELA MAINTAIN A SAFE AND HEALTHY SCHOOL ENVIRONMENT?

What do SELA Summer Families need to know?

- Read and Review SELA's Health Policy Handbook for Summer Families
- Complete the Additional Permissions & COVID-19 Health Policy Acknowledgements Form. Prior to your child entering the program.
- Drop off and picked up child(ren) solely at the Back Door (*see SELA's Drop Off Procedure*)
- Complete your child's Daily Health Screening every morning prior to the start of school
- Keep your child home if they are experiencing any "exclusionary symptoms" as detailed in our *COVID-19 Quick Reference Guide for SELA Students*
 - Please know that your child will be sent home if they are displaying any "exclusionary symptoms" while at school.
- Students are not allowed to bring home masks, backpacks, toys or bedding from home (SELA will provide masks, sheets, blankets & baby sleep sacks)
- Lunchboxes, water bottles, snack containers, jackets, hats etc should be labeled with your child's full name.
- Communicate directly with SELA's school nurse regarding any health concerns there are any questions or concerns that may arise
- Communicate student absence and the reason to SELA's school nurse
- At this time, parents/guardians are not allowed to enter the program, unless prior authorization is obtained by your child's director.

What is SELA doing inside the classroom to maintain a healthy and safe learning environment?

Increased Cleaning, Disinfecting and Laundry (Please note that most of these procedures are already in place, but they will now be done more frequently)

- Regular sanitization during nap time, lunch and snack time will continue
- Toys will be washed & disinfected at least two times per day (steam at the end of the day)

- A separate bin will be available for all toys that become contaminated throughout the day (as a result of germs from sneezing, coughing, saliva, etc.). These toys will be washed in preparation for the next day
- Toilets, tables and changing tables will be cleaned, disinfected & sanitized after each use
- Chairs and cubbies will be disinfected daily
- Door handles and other similar surfaces will be disinfected twice per day
- Bedding will be laundered daily (bedding from home is no longer be permitted)
- Cots and cribs will be disinfected daily
- Outdoor playground areas will be pressure-washed at the end of each day
- Deep professional cleaning & sanitization will be done every night

Frequent Hand Hygiene Practices

- Staff and Students will wash their hands before entering the classroom and will practice handwashing and other hand hygiene techniques every two hours
- Hand hygiene will be performed at the following times (including, but not limited to)
 - Before the start of class
 - After use of the playgrounds
 - Before and after eating
 - Before dismissal
 - Anytime there has been a transfer or possible transference of germs (coughing, sneezing, touching one's face)
 - After diaper changing
 - After use of the bathroom
 - Students will be given enough time to wash hands correctly and thoroughly with teacher supervision.
- SELA provided hand sanitizer is available at all times. Dispensers are currently located in hallways, classrooms, and other common areas.
 - Students preschool age and older may be offered hand sanitizer only if parental/guardian permission is granted.
- Soap, water & paper towels will be available all times

Social Distancing Practices

1. Students will remain divided by age group and classroom throughout the entire school day.
 - Class sizes will remain small (7-10 students per classroom).
 - Students will NOT gather in large groups.
 - Students will eat (snack and lunch) in their classrooms with their teacher.

- Students naptime cots will be spread out in a range in alternating head to toe fashion in an effort to maintain social distance
- Infant Rooms: Separate blankets to hold babies will be used as a barrier and individual blankets will be used during tummy time
- Warm weather will help us to keep classrooms ventilated (open windows and glass doors, in addition to AC)
- All classrooms are equipped with air purifiers
- No outside visitors, including parents/guardians/household members will be allowed to enter the building for scheduled visits only. All visitors will complete a self health screening, be directed to our handwashing station and will be provided with a disposable mask prior to entering the building.

What is required of SELA's staff members?

- Must complete their Daily Health Self Screening daily, prior to coming into work.
- Any staff member that reports experiencing any exclusionary symptoms, will not be permitted to enter the building and will be required to obtain a negative COVID-19 test and/or a doctors note of medical clearance to return to work
- Staff members must notify SELA with upcoming travel plans and may be required to show proof of a negative COVID-19 test if traveling to a high risk area.
- Fully Vaccinated Teachers and staff members will not be required to wear a face mask while indoors and are not required to wear a face mask when outdoors.
- Unvaccinated Teachers and staff members or those who are not yet fully vaccinated, are required to wear a face mask at all times while indoors but may remove them when outside and socially distanced from others.
- All teacher and staff face masks are kept and washed at SELA. Disposable masks are also made readily available.
- Faculty will wear uniforms while at SELA (these will be washed daily at SELA)
- Continue keeping classrooms clean and healthy by adhering to SELA's cleaning procedures, reinforcing proper mask usage, performing, and supervising frequent hand hygiene techniques with students and notifying school nurse if a student is suspected to be unwell.
- Create and implement more outdoor activities to allow students to get more fresh air during the day

Symptoms Help Guide for Parents

This guide is to be used as a tool to help parents decide whether or not to send their child to school. It is not to be used as a replacement for professional medical advice.

MAJOR SYMPTOMS

1. **Fever greater than 100.0 F:** Your child will be required to stay home, no matter what the reasoning might be. We cannot allow any child with a fever above 100.0F into the building. No exceptions.

- Having a fever is one of the simplest and most objective ways to identify that the body is fighting an illness.
- Do not assume that a fever is not present because someone looks to feel fine
- Be sure that your thermometer is in good working order and be sure that your child is not doing anything that could alter their temperature reading

2. **Cough:** Ask yourself the following questions.

- Is this cough new and different for your child and their body?
- Is the cough dry, wet, barking, hacking, and/or loud?
- Does the cough produce other symptoms such as mucus, vomiting, dizziness, sleeplessness, or sore throat?
- How bad is the cough, does it interfere with daily activities?

If you have answered “yes”, to any of these questions your child should not come to school and you should contact your child's PCP.

If you have determined that your child's cough is not new/different because it is related to another cause (chronic cough, allergies, asthma) SELA must have documentation on file, stating that this to be a consideration for your child by your child's PCP.

However, if you feel in any way that this symptom is different than usual, your child should not come to school.

3. **Sore Throat:** Ask yourself the following questions.

- Is this sore throat new and different for your child and their body? ***
- Does their throat hurt when they talk, drink, or eat? If so, what does it feel like?
- Does the inside of their mouth (lips, tongue, tonsils) appear to be redder than normal, have white patches, sores or otherwise look infected/different than normal?

If you have answered “yes”, to any of these questions your child should not come to school.

*** If you have determined that your child's sore throat is not new/different because it is related to another cause (i.e. chronic cough, allergies, asthma etc.) SELA must have documentation on file, stating that this to be a consideration for your child by your child's PCP.

However, if you feel in any way that this symptom is different than usual, your child should not come to school.

4. **Difficulty Breathing:** If you are having trouble breathing then you should seek emergency medical attention IMMEDIATELY!

- Difficulty breathing can include the following signs: Feeling like you are not getting enough air in when you breathe which can cause dizziness, feeling faint or lightheaded, confused, anxious, scared, and tired.
- Physical signs can include bluish extremities, lips, looking pale and sweaty.

Please seek medical attention immediately if you think your child is experiencing any of these signs/symptoms.

5. Gastrointestinal Issues (diarrhea, nausea, vomiting): Ask yourself the following questions.

- Is this new and different for your child, without a possible direct cause? ***
- Does your child show signs of being in discomfort or pain?
- Are they unable to eat or drink without experiencing diarrhea, vomiting and/or feeling nauseous?

If you have answered “yes”, to any of these questions your child should not come to school.

***If you have determined that your child's gastrointestinal issues are not new/different because it is related to another cause (i.e. Irritable bowel syndrome, Crohn's Disease etc.) SELA must have documentation on file, stating that this to be a consideration for your child by your child's PCP. GI issues do to your child ingesting food or drink items that can cause GI issues should be reported to the school nurse directly but does not need to be checked off on the daily screening because they are negative effects of what was ingested not a sign of illness. (Ex. Child was given 2 cups of prune juice and now has diarrhea)

However, if you feel in any way that this symptom is different than usual and may not be attributed to a direct cause, your child should not come to school.

6. Loss of Taste and/or Smell: Your child will be required to stay home, no matter what the reasoning might be. We cannot allow any child with a loss or taste and/or smell into the building. No exceptions.

- We ask that you contact your child's PCP if you think your child is experiencing a loss of taste and/or smell.

7. New Muscle Aches: First ask yourself is there a simple and direct cause for my child's “muscle ache” (ie, strenuous exercise, a recent injury that occurred etc.). If the answer is “no” ask yourself the following questions.

- Is this new and different for my child?
- Does the pain/ache make it difficult/exhausting for your child to perform daily activities such as walking, or playing?

If you have answered “yes”, to any of these questions your child should not come to school.

If you have determined that your child's muscle aches are not new/different because it is related to another cause (Diagnosis of Lyme disease, musculoskeletal abnormalities etc.) SELA must have documentation on file, stating that this to be a consideration for your child by your child's PCP.

However, if you feel in any way that this symptom is different than usual, your child should not come to school.

MINOR SYMPTOMS

Fatigue, Headache, Runny Nose or Congestion, and or any other signs of illness.

For any of the above minor symptoms ask yourself, could any of these symptoms negatively impact my child's school day?

If you have answered "yes", to the above question your child should not come to school.

COVID-19 Testing Options:

Abbott Binax NOW COVID-19 Antigen Self-Test: It is a rapid-test kit that provides results in 15 minutes. It is currently the ONLY at home PCR test that is approved for travel testing. Each kit contains two tests, which should be administered twice over a three-day period, with at least 36 hours between tests. It is available at CVS pharmacies. Here is the link below. <https://www.cvs.com/shop/abbott-binaxnow-covid-19-antigen-self-test-2-tests-for-serial-testing-prodid-550147>

EEC Test Sites: These sites are operated by Visit Healthcare and open to childcare affiliated individuals only, will provide no-cost PCR tests using a simple lower nose swab. Tests will be available

to childcare affiliated individuals who are symptomatic, have been identified as close contacts, or who were possibly exposed, and results will be sent through an on-line portal in 48 hours or less.

To register, please logon onto www.visit-healthcare.com and click on "Sign up for your Visit" then click on your location (Massachusetts Childcare). You will then be brought to a page where you can view their testing site calendar. Also on this page you can, "Sign Up" to register. **To register you will need Su Escuela's EEC Provider Number, P-183059**
